

NO TIME TO KEEP YOUR POOL PERFECT?

THE GOVERNOR

ORP SET POINT CONTROLLER

**LET THE GOVERNOR DO
ALL THE HARD WORK FOR YOU
GIVING A PERFECT POOL
ALL YEAR ROUND!!!**

KEEP YOUR POOL IN PERFECT CONDITION ALL THE TIME....

THE GOVERNOR AUTOMATIC O.R.P. CONTROL FOR SWIMMING POOLS, SPAS, WATER FEATURES

"The Governor" controller has been designed to offer a set point, automatic dosing of disinfectant, into your swimming pool, spa, or water feature.

Dosing manually or semi-automatically cannot maintain a constant level of sanitation in your pool. "The Governor" is able to be used with Salt Water Chlorinators, Brominators and Liquid Chlorine feeders to maintain a constant level of sanitation.

"The Governor" will also prevent over sanitizing of your pool or spa. As heating your pool or spa requires longer running times, "The Governor" will turn off the sanitizer when the set level is reached, therefore preventing excessive levels of chlorine or bromine entering the pool or spa.

"The Governor" has been developed to minimize the health risks associated with poor regular treatment of your pool and spa by governing and controlling the output of the salt water chlorinators, liquid chlorinators etc.

HOW DOES THE GOVERNOR WORK...

By electronic measurement, "The Governor" can control the level of chlorine or bromine in your swimming pool or spa, giving you consistent results.

"The Governor" now displays the O.R.P. reading, allowing the user to precisely set the appropriate level of chlorine or bromine you wish to have in the swimming pool or spa. The unit will now automatically control your chlorinator or brominator as the level of sanitation demands, over or below the set point.

As the correct chemical balance of your swimming pool or spa water is important for the bathers, it is also important for the correct operation of "The Governor". This means that the total alkalinity, calcium hardness and pH, should be maintained at the appropriate levels as recommended by your professional pool technician. The cyanuric acid levels should not exceed 45PPM. Levels higher than 45PPM will effect the efficiency of "The Governor".

Highlights

- **O.R.P. READING DISPLAYED**
- **TIME CLOCK UNITS AVAILABLE**
- **JUST SET AND FORGET**
- **POOL ALWAYS READY TO SWIM IN**
- **VERY LITTLE MAINTENANCE**
- **EXTENDS THE LIFE OF YOUR EQUIPMENT**
- **MAINTAINS CORRECT LEVEL OF CHLORINE**
- **PEACE OF MIND KNOWING YOUR POOL IS ALWAYS SAFE FOR EVERYONE TO ENJOY**
- **SAVES YOU TIME AND MONEY**

**WITHOUT "THE GOVERNOR"
YOUR POOL LEVELS MAY NOT BE CORRECT
RESULTING IN TOO MUCH CHLORINE -
THIS MAY CORRODE YOUR EQUIPMENT,
BLEACH SWIMWEAR, CAUSE SORE EYES**
